

Ramkumar M

VAPT Engineer | Web & Application Security

+91 9787857867 | Bangalore | raamk575@gmail.com | [LinkedIn](#) | [Github](#)

Summary

Recent BCA Graduate with hands-on experience in Web, API, Mobile Application, and Network Security gained through security projects, internship, and CTF laboratories. Familiar with exploitation frameworks, OWASP Top 10 attack chains, and structured penetration testing aligned with the NIST Cybersecurity Framework and SANS Critical Security Controls. Identified 9 vulnerabilities (4 Critical) in an independent VAPT engagement and ranked Top 3% globally on TryHackMe. Seeking an entry-level VAPT Analyst / Penetration Tester.

Professional Experience

May 2026 - July 2026

Cyber Security Intern - ShadowFox | Chennai

- Simulated 5+ **penetration testing scenarios** across Windows and web environments, uncovering **10+ security misconfiguration and vulnerabilities**, and delivered structured remediation documentation to enhance system resilience.
- Conducted **live credential theft demonstrations** using Wireshark, highlighting the risks of transmitting data over **insecure HTTP channels** and advising secure protocol migration
- Authored a **25+ page technical report** detailing attack methodologies, exploitation outcomes, and recommended mitigation strategies, serving as a reference for internal red-team exercises.

Security Assessments

Independent VAPT Assessment – Farchase Solutions (*Self-Initiated*) / 2026

- **Identified 9 vulnerabilities** (4 Critical) including privilege escalation, IDOR, and stored XSS; documented findings in a formal VAPT report following industry methodology.

Projects

September 2025

Passive OSINT Domain Enumerator (*Python, DNS, crt.sh, SSL*) | [Github](#)

- Automated subdomain discovery, DNS record extraction(A,MX, TXT, NS, CNAME), and WHOIS lookups with JSON/CSV output to support domain validation, certificate issuance troubleshooting, and DNS configuration analysis.

Linux Vulnerability Scanner (*Python, CVE Analysis, Docker*) | [Github](#)

May 2026

- Automated vulnerability assessment by identifying outdated packages through CVE signature matching and detecting Linux security misconfigurations, including SUID files, world-writable directories, and Docker socket exposure.
- Improved security auditing by performing baseline comparisons and generating reports with prioritized findings to support remediation and system hardening.

Technical Skills

Programming: Python, Bash

Security Tools: Burp Suite, Nmap, Metasploit, OWASP ZAP, SonarQube, Mobsf, Wireshark, Hashcat, Kali Linux, Nessus.

Security Skills: Web Application Security, DNS Analysis, Privilege Escalation, Subdomain Enumeration, HTTP/HTTPS, TCP/IP, Vulnerability Assessment, XSS, SSRF, SQL Injection, CSRF, IDOR, JWT Security, OSINT, Penetration Testing, Reconnaissance, DNS Enumeration, Source Code Review, Mobile Application Security (Android), AndroidManifest Analysis, APK Static Analysis.

Frameworks & Methodologies: OWASP Top 10, MITRE ATT&CK, Cyber Kill Chain, NIST Cybersecurity Framework (CSF), SANS Critical Security Controls (CSC)

Security Labs & Activities

- Ranked among the **Top 3% globally on TryHackMe** by completing 80+ hands-on labs focused on web and mobile application security, vulnerability assessment, attack surface analysis, and penetration testing.
- Actively solve **Hack The Box and PortSwigger Web Security Academy labs**, strengthening practical skills in enumeration, exploitation, post-exploitation, and secure coding concepts.
- Participated in **DEF CON Group** Coimbatore cybersecurity events, including technical knowledge-sharing sessions and Capture The Flag (CTF) competitions, and competed in the Hack the Planet CTF, strengthening practical skills in web security, OSINT, cryptography, reverse engineering, and digital forensics.

Education

Karan Arts & Science College

CGPA: 7.27

Jun 2023 - May 2026

Bachelor of Computer Applications

Tiruvannamalai, Tamil Nadu
